Not just another bow and arrow game! Its stupidly addictive and well made, the pace and variety is perfect. Working through the city is well worth the effort to make it to the forrest and instead of feeling like a chore like a lot of other similar games, you cant put the controllers down because you have to have one more go. The voice overs are brilliant, feels like an 80s film that can make fun of itself. Im sure there will be more levels to come, the devs seem to be pretty active and want feedback.

Put the air conditioning on, you will definitely sweat.. Very cute, very casual, helps if you can remember where things are as its basically a maze where you want to avoid touching moving things. Achievements exist, if you care about that kind of thing. ;-)

Not a whole lot of storyline, but I still found it fun for the short amount of time it took to get the game beat. Upon beating you unlock a time-based difficulty version of the game.. I know it's just a dollar and some cents, but I had to pay for it and now it's free to play? I was neutral about the game until that \u2665\u2665\u2665\u2665\u2665\u2665t. The game needs a lot of work too.. There is literally, nothing to see. First things first..... the game is not bad at all for being 7 years old at the writng of this review. It is a fun tank sim with simple contols and a simple HUD. You as the player are not overpowered and it does require some thinking when you are actually engaging targets.

Now as for the technical stuff... once you have downloaded the game go to your steam folder then to steam apps then common , find this game and then right click on BOTH the applications and run compatability checks on them.

It will run with no problem after you do this, but you have to run the compatility checks on BOTH... or else you wont be able to shoot.(:P)

Last thing.. now you run the game (if you dont do the compatabilty FIRST wndows 8 will get caught in a loop :D)

Enjoy.. Pretty addictive game with quite a bit of depth and attention to detail. Dev seems pretty active and i look forward to seeing what else gets added to the game. Definately worth the buy.. Funny and entertaining, one of my favorite VR games so far!

Good game, but should have been called Star Squidizen.. One of the best racing games out there its great.. Heartwarming hidden-object game. Protagonist is a woman reminiscing of coming to Oahu and meeting her true love at the orphanage she was staying at. Her story starts when she is seventeen (six months from her eighteenth birthday). She meets the man she falls for, as he is working at odd jobs helping the orphanage. She also has a bit of trouble from one of the other girls, who wants Stephen for herself, and does a variety of nasty tricks to try and ruin the protagonist's chances. Stephen has dreams of joining the Navy, which he does. And plans to propose to the protagonist on her eighteenth birthday.

Oh, I guess I should mention that her eighteenth birthday is December 7th, 1941\2026

The HO scenes are interesting and the minigames challenging.

Worth the price.. Very interesting game with a cool story. I would like to see a longer/more complicated game from this developer, because this was truly entertaining! Worth playing.. Definitely a great app and really satisfied me with the customization options. I've been wanting Girls' Frontline Live2Ds on my desktop.. roses are red  
violets are blue  
i wanna lewd my cat  
but steam won't let me see boob

0/10. Tower of BUG). If you use anything other than some kind of XInput controller (read: Xbox 360, Xbox One or one of those Logitech Variants), this will have the worst controller support ever for you. Would not recommend for anyone with taste in PC gamepads.. Can't say i like it. I bought it because i really like oldschool RPGs but Konung 2 it's too slow for me, and there's not any map of locations. Another things are encounters, sometime you fight with spiders witch is simple and in next encounter you meet dragons even if you are level 1. It's make the game more difficult than it should be. And the characters are kind of boring, but I shouldn't expect anything like in BG.

However game have some "pros": 6 characters with different begins is cool! And the thing with village management was good idea, but could be done better. And the world, I think it was quite big.

Maybe it's just not RPG for me, or maybe they should make somethings better, but i wasn't enjoying when I was playing :/
